Demographics

There is no register of the demographics for this travel/activity.

Activities

These activities were conducted in the cities: Chiapas and Ciudad de Mexico, between May 10th and 20th.

Chiapas

#1 Torsiendo – Private event

Audience: 03 / 2 women / 01 man

Title: TorSiendo – Contra la censura, navegación anónima

When: May 10th

Context:

Technical workshop before the public event.

Agenda:

- Onion Services
- Bridges

- Onionshare and Tails
- Nextcloud to use with Tor and Raspberry Pi
 - Onionshare setup on nextcloud

Experience Map – Installing an Onion Service in a Raspberry Pi

Connect to raspberry Pi	Run Updates	Explanations about Ips, NATS and .onion	Connects and Run Updates	Installing Tor
Documentation for the Raspberry Pi is limited	Internet problems, rebooting the Pi	Question: You don't need a static IP for an onion service?		
		Question: Six servers to connect to onion services?		

Edit <i>torrc</i> file	Removing Tor	Update source.list	Reinstall Tor	Edit <i>torrc</i> file
Something went wrong				

Open file and uncomment the hidden services lines	Change location to a location that makes sense for you	Leave port info as it is	Restart Tor	Go to the directory where you installed the service <code>\$ cd /var/lib/tor/name/</code>
			Question: about systemd?	<code>\$ ls</code> to show hostname and private_key
				<code>\$ cat hostname</code> to show your onion service name

Connect to the onion	Open Tor Browser	Edit a <i>html</i> file for the onion service	Edit <i>torrc</i> and add another service	
Question: how		Question: what is	<code>hiddenservicedir /</code>	Question: How to

does it relates to Apache and Nginx or websites that are on Wordpress?		the difference between Orbot and Tor Browser on Android?	var/lib/tor/otro_servicio hiddenserviceport 80 127.0.0.1:80	torify?
		Question: Can I add another Onion service to the torrc file?	Restart Tor	

Other questions:

- How many onion services does Tor runs? How do you measure the percentage of Tor traffic?
- What are the differences between Onion v2 and v3?

Onionshare in Tails

Onion services is a service on your computer and it will stop running if you shut your computer down.

Questions:

- Why to use Tor in Tails?
- Should I use Tor for everything or just some things?
- Does the Tor messenger uses onion services?
- Where you can see our metrics? <https://metrics.torproject.org>

Bridges

Topics:

- Explaining bridges
- There is only 1000 bridges
- No need to use a bridge in Mexico, because there is no censorship

Questions:

- How can I use Tor on iOS?

#2 Torsiendo – Training for Journalists

Audience: Media activists, photographers, journalists, etc.

When: May 11th

Questions:

- Why is Tor so slow?
- How does the circuits work?
- Why does my traffic goes through Germany?
- Will Tor help me if my computer is infected with malware? Is Tor browser the same as anti-malware?

#3 Torsiendo – Public event

Audience: journalists, activists, ngos workers (young and old)

Title: TorSiendo – Contra la censura, navegación anónima

When: May 11th

Context:

Public event with multiple audience.

Suggestions raised:

- We need an explanation somewhere of how to create vanity onions
- Something on the *support portal* that's like....**if you want total privacy, use tails.**

Questions to be answered:

- Why is it so slow?
- Does Tor protects my phone number?
- Is Tor and Deep Web the same thing? Is it safe?
- How does the circuit work?
- It says “cookies aren’t saved, only temporarily while using the browser”, what does it means?
- Am I safe using the incognito mode?
- Is Tor browser for Android also made from Firefox?
- Do I need to type out the whole onion address to connect to it?
- Why the .onion domain doesn’t work if I try to access from another browser, like firefox?

- Is onionshare like google drive -- does it have an archive? or is it just for sending? (onionshare)

#4 Torsiendo – Workshop with NGOs

City: Chiapas

When: May 13th

Ciudad de Mexico

#1 Workshop for Journalists

Audience: Red de Periodistas - <https://www.periodistasdeapie.org.mx/>

When: May 15th

#2 Workshop TDT

Audience: Red Nacional de Organismos Civiles de Derechos Humanos – Todos los derechos para todas y todos - <https://redtdt.org.mx/>

When: May 16th

#3 Meetup Criptocumbión

When: May 18th

#4 Tor meetup for Feminists

Audience: Feminists / 07

City: Ciudad de Mexico

Title: Getting to know Tor / Conociendo Tor

Context:

government websites block activist IP addresses and also exit relays

one possible cause of the downloads blocking is that the browser lacks the necessary plugins

Agenda:

- Introductions
- Community agreements
- Goals

- Roles
- Presentation

Script:

- What are the main Tor's characteristics and tools
- What are the risks of using Tor?
- Who are your adversaries?
- How do these risks affect your work?
- How can Tor support feminist work?
- What does a feminist Internet look like?

Where to go if you have a problem: trac.torproject.org

If you want to talk about something more sensible you can reach us privately: alison@torproject.org

Problems related to accessing:

- Problems accessing governmental pages

Questions to be answered:

- What are the risks associated with using Tor?
- How does Tor affect the use of the Internet for building community and maintaining community?
- Is it possible to use whatsapp within Tor? (*"tools like whatsapp have been important for creating and maintaining communities"*)
- When to use Tor?
- There is some websites that I can not access trough Tor, why is that? What to do about it?
- What is this warn about my screen size?
- How can I contribute to Tor?
- How can I raise awareness about Tor with my fellows?
- I find it hard to use Tor, can I send some suggestions or questions about usability? To where?
- Should I use Orbot or Tor browser for android? What is the difference?

- How can Tor help build community?

Persona:

Journalist, works with sensitive info, does research/write/searchs and visits webpages not wanting people to know about her certain research. She wants to know more about Tor, how to use it and how to get trained. She's going to start doing national television for investigative journalism.

#5 Relay Meetup

Where: UNAM

When: May 20th

Audience: around 6 people

Blog post: <https://blog.torproject.org/events/reunion-de-operadoras-y-operadores-mexico>
